

High-precision optical cable corrugated sleeve

Voltage range

636V-876V

Rated voltage

768V

Cell type

Lithium iron phosphate

Overview

These precision sleeves are primarily used in fiber optic adapters and attenuators to connect and align two ceramic ferrules, ensuring optimal signal transmission. Kyocera's extrusion molding process creates ferrules with excellent coaxiality, and our precision machining ensures excellent concentricity with precise. Our zirconia ferrules are divided into 4 categories, single-mode, multi-mode, capillary and custom as well as. We offer several kinds of split sleeves with various ferrule pull force requirements for $\phi 2$.
