

How about butterfly-shaped drop fiber optic cables

Overview

The FTTH Drop Fiber Cable is also called butterfly optical cable because it looks like a butterfly in cross section. It has the advantages of small outer diameter, light weight, low cost, reliable performance, and easy installation. They are called butterfly-shaped due to their unique design, which features a flat shape with two parallel fiber ribbons running down the center. Central loose tube cables and self-supporting FTTH drop cables are designed for outdoor aerial distribution.

How about butterfly-shaped drop fiber optic cables

Four -end connection methods of butterfly -shaped optical fiber optic

Butterfly-shaped optical fiber cables are a popular type of fiber optic cable that is commonly used for data transmission in telecommunication networks. They are called butterfly
