

# **How are wire mesh cable trays used in UK data centers**

## Overview

---

Wire mesh cable trays are integral to modern data center frameworks, providing structured pathways to manage the many cables transmitting power and data. With a wide range of options, find the perfect fit for your data center's unique needs and enjoy seamless installation and maintenance. Cablofil wire mesh cable tray, a high-quality, reliable cable management solution for data centers. However, because of their small cross sections, and their limitations for changes or modifications, today they are only used primarily to accommodate a small number of cables and where they are accessible to the public or need high protection against mechanical hazards. Integrated cable guidance: Drop-off kits clip seamlessly onto both Stago ducts and Defem mesh trays.
