

# How big are two 185 cable trays

## Overview

---

The trays are available in 3-meter (10-foot) segments made by almost all manufacturers. It is lengthy enough to cover a long distance within a short period of time, but short enough to be carried by two people. In practice, cable tray dimensions are a system of interrelated measurements —width, depth, length, and material thickness—that directly affect cable fill compliance, heat dissipation, structural loading, and long-term expandability. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to si osure, overheating or. National Electrical Code (NEC) specifies the capacities of cables rated at 2000 volts or less in cable trays.
