

How is Huawei s hollow fiber optic cable

Overview

Inside the hollow, HCF features an air-filled center channel that is surrounded by a ring of tubes, akin to a honeycomb pattern. It is mainly used to connect a switch to an AP so that the switch can provide PoE power and transmit data for the AP. There is also hollow core fiber (HCF), which some believe could herald a long-awaited paradigm shift. With Huawei's core concept for ODN construction centering on full and dense coverage coupled with short and easy access, Huawei's ODN 3. Hybrid cables break the 100-m access limit of Ethernet cables, enabling more flexible deployment of RUs and Wi-Fi 6/7.
