

How large is the mobile optical cable network in Kyrgyzstan

Overview

At least 212 communication nodes have been built, over 3,900 kilometers of fiber-optic Internet network have been laid, and 30 backbone nodes have been deployed in Kyrgyzstan since the beginning of 2025 to enhance digital connectivity. Telecommunications in Kyrgyzstan include fixed and mobile telephones and the Internet. The long-term goal of the government's information and communications technology strategy is for the telecommunications sector to contribute 5 percent to gross domestic product by 2010. 6Wresearch actively monitors the Kyrgyzstan Active Optical Cable Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook. Our insights help businesses to make data-backed strategic decisions with ongoing market.
