

How many meters can the distribution box be moved

Overview

The horizontal distance between switchbox and fixed electrical equipment should not exceed 3m. Yes its possible to have the fusebox moved, this can be carried out by a registered electrician and will cost between £300 and £700 depending on whats involved and how much rewiring is needed. Your electricity supplier may resite the meter free of charge, once the fusebox and incoming cable are in. The fixing method should be firm and reliable to avoid movement or tilting of the box due to vibration or collision. Yet the distribution box is a highly complex component that not only ensures safe power distribution, but is also responsible for protection in an emergency.
