

How to connect a switch to a passive fiber optic cable

Overview

Most modern fiber-enabled network switches require an SFP transceiver module featuring a duplex (two strand) multimode OM3 or duplex single mode OS2 connection with LC connectors. In this article, we'll explain how to connect multiple Ethernet switches using fiber optic cables and the equipment required for this to work. Network topology refers to the way in which the links and nodes of a network are arranged in relation to each other. Choose an SFP module based on the fiber optic cabling that will be connected to the network switches. Fiber optic technology has revolutionized data transmission, offering unparalleled speed and.

How to connect a switch to a passive fiber optic cable

How to use fiber optic connection on your Switch

This video attempts to cover all the possible solutions to help you choose suitable SFP module to setup fiber optic link.
