

# **How to connect the fiber optic cable to a mobile optical distribution box**

## Overview

---

First, connect each pre-terminated fiber optic cable to the adapter panel separately to ensure that the ports correspond one by one; then fix the fiber optic adapter panel to the front panel of the distribution box with the bend radius control clip. Have a network installation project?

Fiber Optic Cables: The primary medium for your connections. This guide will explain the entire set of activities involved in installing Fiber optic cable contractors -from the early planning stage right through testing-for facility managers, IT teams, and low-voltage contractors to build high-performance networks safely and efficiently. In general, installing the optical fiber distribution box can be divided into three steps: installing the optical fiber distribution box on the rack, introducing the optical cable into the optical fiber distribution box, and planning the optical fiber path in the optical fiber distribution box.

## How to connect the fiber optic cable to a mobile optical distribution
