

How to connect the primary grounding of the distribution box

Overview

Grounding electrode conductor (GEC) – wire connecting the panel to the ground rod. Find the grounding bar or PE bar Open the distribution box and find the position marked with the grounding plate or PE letter. The National Electrical Code (NEC) lists eight specific methods to make grounding and bonding connections in Sec. Failure to install these connections properly can result in shock, fire, or, most certainly, power quality problems. Whether you're a seasoned pro or just starting out, this comprehensive guide will give you practical. The primary hardware is the green hexagonal grounding screw, threaded to fit a designated hole in the metal box.
