

How to cut materials for cable tray bends

Overview

This short shows key steps: cutting sheet metal to size, punching or slotting for wire access, bending edges to form the tray shape, welding joints for strength, and smoothing edges for safety. In the Oglaend System Cutting Guideline you can easily find out what the optimal cutting lengths/intervals are for all modular products. You have used your protractor and worked out you need to make a 22° angle in a 600mm cable tray. This publication is intended as a practical guide for the proper and safe* installation of cable ladder systems, cable tray systems, channel support systems and associated supports.
