

How to extend the fiber optic router s network speed

Overview

****Use a Wi-Fi extender:** A Wi-Fi extender can help you extend the coverage of your fiber internet connection. Select an ISP that provides a service level agreement (SLA) for a specific level of performance. For example, if your fiber internet is 1Gbps, your router should say it offers speeds at least as fast. Connection: To squeeze the absolute last drop of bandwidth out of your connection, you will need to be. Fiber internet delivers lightning-fast speeds—up to 1 Gbps or more! But even the fastest connection can't work miracles if your Wi-Fi signal dies in the backyard or struggles to reach the attic.
