

How to install an eight-core fiber optic cable junction box

Overview

OPGW cable joint box installation involves several key stages: selecting the appropriate location, preparing both the cable and the joint box, splicing fibers, and sealing the joint box properly. Indoor cables can be installed directly, but you might consider putting them inside innerduct. Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. Adhering to these steps ensures optimal performance and longevity of the telecommunications system.

How to install an eight-core fiber optic cable junction box

Integrated wiring fiber optic distribution box installation tutorial

In general, installing the optical fiber distribution box can be divided into three steps: installing the optical fiber distribution box on the rack, introducing the optical cable into the optical
