

How to set up a 300Mbps router for fiber optic internet

Overview

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. Make sure to update the firmware, configure Wi-Fi security, and customize your network name for optimal performance. This can be done in two ways: Underground Installation – Fiber cables are placed in conduits underground, offering better protection from weather and physical damage. In this article we'll break down how fiber internet is installed - from the network fiber drop outside your house to the in-home setup with your router and gateway - and what you should expect at each stage.
