

How to set up internet access with a router that has no fiber optic cable

7.5mm Radius

Overview

You can get home Wi-Fi using wireless internet —like 5G home internet or fixed wireless—without running a cable line into your house. From finding the right router to configuring the wireless settings, we will show you how to unleash the power of Wi-Fi connectivity in your home or office. To set up your router, connect one end of a compatible Ethernet cable to your home's Ethernet outlet before connecting the other end to your router's WAN port. With the rapid advancement of technology, it's now possible to access high-speed internet without the need for a coax outlet.
