### Why are relays so frequently driven by optocouplers?

Since the advent of the many microcontroller development boards, like Arduino, there have been a number of relay modules sold to drive mains AC loads. A lot of these seem to use an optocoupler,

Optical splitter cassette type refers to the port 2.0mm (3.2mm clip-on fiber multichannel direct output with a plastic box packaging protection and easy to use.

Optical splitter rack mount type is using metal box packaging which can be installed in 1U" frame or cabinet.

Optical splitter LED box type is made by flame retardant material box or plate packaging. Mainly suitable for cable printed fiber box and wall-mounted terminal box.

Optical splitter mini type refers to the port 0.9mm clip-on fiber multichannel direct output with a compact design and easy to use.

## Relays and Optocouplers

This interfacing is possible thanks to ABB's relays and optocouplers ranges, which offer wide adaptation in both voltage (from 5 to 400 V) and current (from 10-7 to 16 A) as well as high isolation between
