

How to use the optical port of a PoE switch

Overview

Step 1: Insert an SFP module into the fiber port of the PoE media converter and an SFP module into the SFP port of the switch. 2- How to physically connect the new fibre to the main network switch in the house?

(see bubble #1?

) 3- How to safely run the optic fibre in the garden?

How deep to burry it?

what sort of conduit should I use to protect it?

How to best manage the bend of the fibre without braking it?

Sorry for this. Pictures, charts, images and all other information hereinafter are for description and explanation only. The information contained in the Manual is subject to change, without notice, due to firmware updates or other reasons. In order to extend long distance network, it's common practical operation to use fiber optical cable to link two PoE switch.

How to use the optical port of a PoE switch

How to use fiber optic connection on your Switch

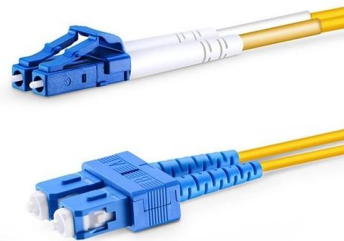

This video attempts to cover all the possible solutions to help you choose suitable SFP module to setup fiber optic link. If you have any question about fiber optic SFP module, please leave us
