

Huawei fiber optic connector has no network

Overview

If the router's indicator is steady red, it is not connected to the Internet. Fiber optic networks are celebrated for their speed and reliability, but even the best systems can encounter problems. If a network cable does not meet the preceding requirements, replace it with a compliant one or reduce the interface speed. I currently have the TP-Link plugged into the LAN of the Huawei (thus creating two LAN networks), but I would like to make the Huawei pass through, i.

Huawei fiber optic connector has no network

Some devices wirelessly connected to the router cannot

Connect your phone to the router's Wi-Fi network and open the HUAWEI AI Life App . On the home screen of HUAWEI AI Life App, touch the router concerned to
