

Hydraulic clamps for opening bridge frames

Overview

Hydraulic bridge clamps offer remote control of the clamp function with a hydraulic system to engage and release the clamp arm. The clamp can affix to robotic arms and assembly lines for automated movements of large or heavy loads in manufacturing. OneMonroe is a renowned manufacturer of high-quality hydraulic clamping products, designed to meet the demanding needs of diverse industrial applications. They are very common for clamping the workpieces and applying hand tools and other power tools to them.

Hydraulic clamps for opening bridge frames

Closed-Loop Hydraulic Cylinder Drive for UK Bascule Bridge

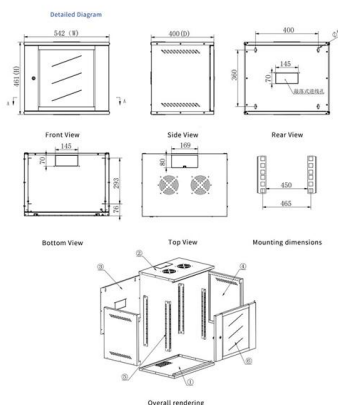

The £121 M project opened for public use on February 1, 2024. A key innovative feature of the bridge is the closed-loop hydraulic cylinder drive developed for this project to offer advantages over traditional
