

Indoor optical cable CPR

Overview

CPR fire-resistant optical cables with Euroclass Dca, Cca, and B2ca classifications. Sensing & Monitoring Solutions based in Optical Fibre We have product quality certificates UL, BUREAU VERITAS and DNV, and other approvals of our cables. Compact 12 and 24 fibre CPR Cca rated indoor optical cable with low diameter for fast, clean installation in European data centres, risers, and structured cabling environments. The cable complies with CPR requirements, making it suitable for use in riser spaces and other indoor pathways where fire safety is a priority. Electrical and optical CPR cables must also play their part in meeting these priorities – especially because of increasing cable densities in modern buildings. Belden has invested in a cross-functional team of research and development, product management, production, quality and purchasing experts to ensure that Belden's cable products comply with CPR (Construction Products Regulation) rules being implemented by the European Commission (EC).

Indoor optical cable CPR

China Indoor Optical Cable, Outdoor Optical Cable,

Fiber Optic Cable Solutions for Every Application
We provide a complete range of Indoor Optical Cable, Outdoor Optical Cable, and Fiber Optic Patch Cord to cover
