

Inspection of Communication Tower Projects

Overview

The inspection process involves a detailed assessment of tower structures, foundations, anchoring systems, ladders, platforms, fall protection systems, antennas, cables, and grounding arrangements. Communication Tower Inspection is a critical safety and compliance activity that ensures the structural integrity, operational reliability, and regulatory compliance of telecom towers used for mobile, radio, and data transmission. Review previous inspections, verify no outstanding actions, check building exteriors, doors and windows, paint and coating, and evaluate rigging screws and turnbuckles for defects or. Turriss provides a complete inspection and condition assessment services for towers and rooftop sites used for telecommunication and broadcast services. We perform a visual examination of tower members for bent, fractured, or missing pieces.
