

Installing the ground-level distribution box

Overview

Wiring Connections Strip wires → connect to terminals (phase, neutral, ground) → arrange neatly. Whether in a home or an industrial facility, this box keeps your electrical setup organized, functional, and efficient. An electrical distribution box, also known as a power distribution box, panelboard, or consumer unit, is the core of an electrical system. 7 meters) high makes it easily accessible without the need to bend or stretch excessively. 26 mm² (10 AWG) ground wire must be used, and in all other markets a 6 mm² must be used. According to the "Code for Acceptance of Construction Quality of Building Electrical Engineering" GB50303-2002, the vertical distance between the bottom surface of the fixed stainless steel enclosure ip67 and the ground should be greater than 1.
