

Intelligent PDUIK10 for Private Power Grids

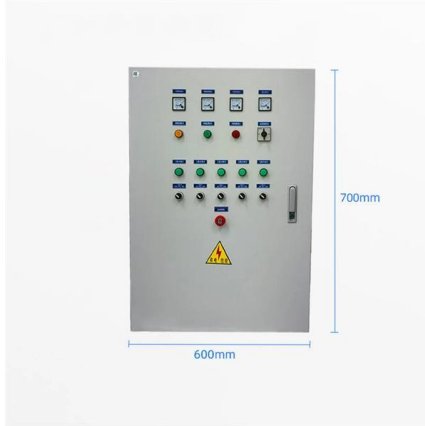

Overview

The Intelligent PDUTM provides network-grade power distribution, remote/local monitoring, and outlet control. Intelligent PDUs and Intelligent Power Management play an important role within the Data Centre / Enterprise IT environments. The Kentix SmartPDU combines precise energy and residual current monitoring directly in the rack with automated alarm and escalation chains ("from sensor to action")—delivering not just measurements, but real actionable intelligence for early risk detection and outage prevention that conventional. Our portfolio includes 19" and 10" PDUs, as well as vertical power strips, offering maximum flexibility for different rack layouts and space requirements. Leading Provider of PoE Products and Data Center Equipment, active and passive networking.
