

Intercity fiber optic cable

Overview

Telstra InfraCo already has the largest fibre and duct network in Australia with 250,000km of fibre optic cable. It is designed to provide high-speed and high-capacity connectivity between large population centres in. The first leg connects Sydney to Canberra along the coastal route, offering a high capacity, low loss fibre capability to support the next generation of data growth. Australian telco Telstra has installed a fiber optic cable across the bed of Sydney Harbor as part of its inter-city fiber network.
