

Irish Bus Connector Series

Overview

BusConnects is an ongoing public transport infrastructure programme in Ireland, managed by the (NTA), focused on the in several cities in the country. Described by the NTA as intended to "improve bus services across the country", as of mid-2022 the programme was in "implementation" phase in, "" phase in, with the projecting similar initiatives in Galway, Limerick and Waterford.

The figure displays four types of optical fiber cables, each with a side view and a cross-sectional view of the fiber core and cladding.

- 1. Single-mode Fiber:** The side view shows a black cable jacket with a blue fiber. The cross-section shows a single-mode core with a diameter of 9 μm and a cladding diameter of 125 μm.
- 2. Plastic Optical Fiber:** The side view shows a black cable jacket with a yellow fiber. The cross-section shows a multi-mode core with a diameter of 1000 μm and a cladding diameter of 125 μm.
- 3. Dispersion-shifted Fiber:** The side view shows a black cable jacket with a blue fiber. The cross-section shows a multi-mode core with a diameter of 50 μm and a cladding diameter of 125 μm.
- 4. Bimodal Fiber:** The side view shows a black cable jacket with a blue fiber. The cross-section shows a multi-mode core with a diameter of 50 μm and a cladding diameter of 125 μm.

Construction is to begin within weeks on the first of 12 dedicated bus corridors planned under the BusConnects project in Dublin.
