

Is 1310nm a single-mode or multimode fiber

Is 1310nm a single-mode or multimode fiber

SFP Wavelength Guide: 850nm vs. 1310nm vs. 1550nm

In contrast, 1310 nm and 1550 nm SFP modules are designed for single-mode fiber (SMF), which supports significantly longer distances due to

Single-Mode vs Multimode Fiber and 1300nm/1310nm SFP

Historically, 1300nm transceivers were associated with multimode fiber (MMF) and older technologies such as 100BASE-FX, while 1310nm SFPs are typically used with single-mode fiber (SMF).

Convert Multimode to Single-Mode Fiber

Transponders are used to convert the 850nm multimode to 1310nm single-mode fiber. The transponders with multimode and single-mode SFPs can cost 50% less than buying proprietary single-mode SFPs
