

Is exporting network server racks easy

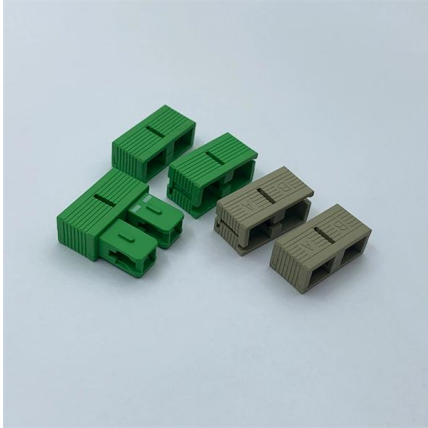

Overview

This post gives you a shipping professional's 5-step process for packaging and shipping server racks safely. Even if you use the most experienced server rack shipping company, the shipping stream can be rigorous, and no matter how conscientiously you prepare and protect your. Because server racks are often the most expensive equipment in a data center, both in terms of the cost of replacement and the cost of lost data in the event of damage or theft, safe delivery of server racks is critical to data center relocation. All equipment is "racked" within the cabinet before onsite deployment so that the cabinet can simply be placed within the data center. It matters what type of equipment that you're shipping, this includes but isn't limited to: The brand of the equipment (whether you're. The rack consisted of multiple Aruba switches/controllers and Cisco router stacked on top of each other.
