

Italian Bridge Construction

Overview

- In the 1960s, a wide variety of proposals were advanced, including everything from submerged tubes to floating struts,, and a revolving central section of the bridge. MILAN (AP) — Italy cleared the way Wednesday to build the world's largest suspension bridge linking the Italian mainland with Sicily in a massive 13. 5 billion) infrastructure project that has been long delayed by debates over its scale, earthquake. The Strait of Messina Bridge (Italian: Ponte sullo stretto di Messina) is a proposed 3. An undated file image showing a computer simulation of the Messina bridge, the winning project by engineering construction giant Impregilo, now known as Webuild, linking Sicily to the Italian. The plan received endorsement from an inter-ministerial committee responsible for overseeing strategic public.
