

Japan 200G Optical Router

Overview

200G Transceivers by JTOPTICS deliver high-speed optical data transmission and are ideal for data centers, enterprise networks, and telecom applications. Engineered for reliability and scalability, these transceivers ensure efficient and seamless communication across various. The high bandwidth QSFP56 module supports 2 km links over single-mode fiber via LC connector. Two waves of 100G client signals are aggregated into a 200G line, and the AMP installed inside the device enables long-distance transmission even in 1U size.
