A 3D rendering of a metal safe with its door open. The interior features several horizontal shelves and a locking mechanism on the right side. The safe is shown from a perspective view, highlighting its sturdy construction and internal compartments.

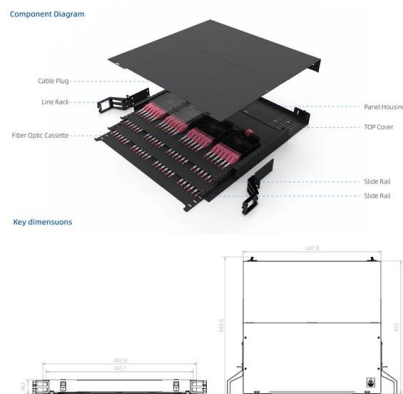

Enclosure made with modular profile. Able to withstand high electrical and mechanical voltages. A unique design made in A304L stainless steel (polished),

Distribution enclosure, Distribution box

Used for strong current connection of high voltage distribution box, all-in-one controller, battery box and other equipment. JX59 single-core series adopt plastic housing, while JX59M single-core series

A white, ruggedized industrial connector with multiple ports and a locking mechanism. The device has a rectangular body with rounded edges and a textured surface. On the front face, there are several circular ports of different sizes, some with protective caps. A metal latch or locking mechanism is visible on the right side. The overall design suggests it is used for industrial or outdoor applications where durability is important.
