

# Latvian Optical Modulator 200G

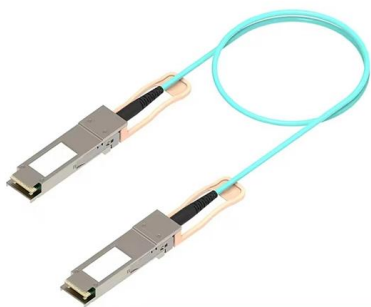

**(PDF) 200 Gb/s Optical-Amplifier-Free IM/DD**

We experimentally demonstrate an O-band single-lane 200 Gb/s intensity modulation direct detection (IM/DD) transmission system using a low

#### Why Choose Us

- 20 Years of OEM/ODM: 20 years factory manufacturing experience.
- Professional R & D team: 30 years experience in optical electronic engineering.
- Fully Certified: Quality certified (UL, CE, FCC, ROHS, ISO9001, ISO14001, etc.).
- Timely Delivery: 21 production lines, 500+ employees. Timely delivery guaranteed.
- Quality Assurance: Professional QC team with full process inspection.
- After-sales service: After-Sales Service for Customer Satisfaction.

### PAM4 for 200G/L Optics at 500m and 2km

Proposal: Adopt PAM4 optical modulation as the basis for 200 Gb/s per lane 500m and 2km SMF reach objectives. Full baseline proposals likely to take some time to define, gated by PCS/FEC decisions.

## **200 Gbit/s Optical PAM4 Modulation Based on Silicon Microring**

Using this high-performance and compact modulator, the modulations of 120 Gbit/s NRZ and 200 Gbit/s PAM4 are experimentally demonstrated with the bit error ratios of  $1.5e-3$  and  $1.08e-3$ , respectively.

## **Modulation proposal for 200G/L solutions for 500m and 2km reaches**

Proposal: Use PAM4 as the modulation type for 200G/L optical solutions at 500m and 2km reaches. PAM4 link penalties (especially MPI) are well understood and reasonably contained. Alternate

## **200G QSFP56 Optical Transceiver**

Ideal for 200G Ethernet and data center interconnects (DCI). This transceiver offers plug-and-play deployment, low-latency transmission up to 10km, and seamless integration with major switches.

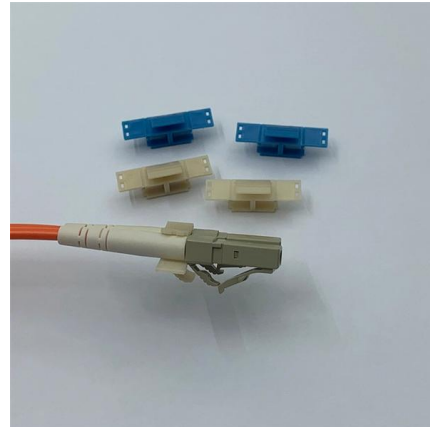

[Contact Us](#)

**What is the 200G optical transceiver?**

Although not as fast, NRZ (at 200G) offers other desirable features, including lower power consumption, lower latency and easy deployment. 200G NRZ can achieve
