Layer 3 switch connected to dual routers

Connecting two layer 3 switches together

So I have a couple of questions. 1. Can you setup two layer 3 switches and still pass vlan information between the two. Example, lets say the metro e connection is connected on port 48 on

Can I setup a second router through a switch that is connected

Putting a second router in bridge mode when it's already connected to Ethernet is useless. The only functionality at that point would be like acting like a switch and it provides extra ports.

Inter VLAN Routing with a mix of Layer 2 and Layer 3 Switches

Hi all, I've got a basic Layer 3 switching question here I have three Procurve switches in the network - two of them are layer 2 switches, and one is a layer 3 switch. We have two VLAN's. I

2 Routers connected to a switch in a single network

At home I have the following setup - a tp-link switch modem connected to the internet and 2 routers (both AX53 3000), connected to that

Layer 3 Switch vs. Router

Layer 3 switches are typically faster and more efficient at routing data within a local network, as they use hardware-based switching to forward packets based on IP addresses. Routers, on the other hand,

Inter VLAN Routing by Layer 3 Switch

Speed: Inter-VLAN routing by Layer 3 switch is faster than other methods, as the Layer 3 switch can perform the routing process quickly, without requiring the intervention of an external router.
