## Distribution switchboards

Types of Distribution Switchboards  
 Two Technologies of Distribution Switchboards  
 Standards IEC 61439  
 Internal Arc Withstand Tests  
 Notes  
 Universal distribution switchboards  
 Switchgear and fusegear, etc. are normally located on a chassis at the rear of the enclosure. Indications and control devices (meters, lamps, pushbuttons, etc.) are mounted on the front face of the switchboard. The placement of the components within the enclosure requires very careful study, taking into account  
 Functional distribution switchboards  
 Generally dedicated to specific applications, these distribution switchboards are made up of functional modules that include switchgear devices together with standardised accessories for mounting and connections, ensuring a high level of reliability and a great capacity for last-minute and future changes.
