

Lower fiber optic cable overhead hook

Overview

Ftth suspension hook also called fiber optic cable clamp hook, is designed to tension or suspension drop cable wire clamps or FTTH anchor clamps with suitable fiber optical cable in outdoor or indoor overhead FTTH network constructions. Our Fiber Optic Mounting Hardware category includes essential components designed to secure, organize, and protect fiber optic cables and equipment. Optical Distribution Network (ODN) is composed of OLT and user equipment interconnected by optical fibers, splitters, and connectors, with downstream signal streams coming to the user interfaces and upstream signal streams for OLT processing purposes. It ensures that the cable maintains the appropriate bending radius, extending its service life.

Lower fiber optic cable overhead hook

Fiber Suspension Clamp

Fiber Suspension Clamp, also known as fiber optical hooks, is commonly used to protect non-self-supporting overhead outdoor fiber optic cables, including ADSS
