TECHNICAL SPECIFICATION I.R.O. 63,100,160 & 315 KVA L.T.

For temperature rise test, a distribution box with all assembly of Isolator / Porcelain cutouts shall be kept in an enclosure such that the temperature outside the box shall be maintained at 50 ° C.

Power Distribution Unit

The Eaton line of three-phase power distribution units (PDUs) provide robust power distribution that can be easily tailored to meet the design specifications of any facility or data center. The PDU offers

Three Phase Distribution Box Functions and

A three phase distribution box safely distributes and protects power for large equipment in factories, buildings, and high-demand commercial settings.
