

Method for grinding the inner hole of ceramic ferrule

Overview

During grinding, apply the grinding paste to the grinding rod and grind the inner hole while rotating. Orbray's Micro hole processing technology has evolved from micron-to nano-level order. The utility model discloses a pottery lock pin hole grinder relates to grinder technical field, including grinder main part and fixing device, the top one end swing joint of grinder main part has fixing device, the top other end fixedly connected with grinding mechanism of grinder main part. In this paper, the design and development of a zirconia ceramics microhole grinding system is proposed to overcome the problems. 3 also mentions the defects of the above-mentioned grinding method in the prior art description of the grinding of the inner hole of the ceramic ferrule, that is, the processing time is long However, it is obvious that it is only suitable for.

Method for grinding the inner hole of ceramic ferrule

Ceramic Ferrule

Since the blank of the ceramic ferrule contains a small hole of 0.1mm, and the requirements for the size concentricity are very high, it is only possible through
