

Mns distribution cabinet intelligent device

Overview

It is the leading technology combining maintenance-free frame structures and busbars, a fully modular construction and the capability to integrate feeder, motor starter, variable speed drives, power factor compensation etc. MNS is ABB's low-voltage switchgear and controlgear assembly for power distribution and motor control. The MNS design is verified in accordance with the latest IEC standards, IEC 61439 -1/-2 and IEC TR 61641. Operating at voltage levels of 380V or 660V, with current ratings ranging from 630A to 3150A, this system is. for the implementation of total electrification projects, including power distribution, process electrification and automation systems. It is applied to all low-voltage systems requiring high reliability field connection in the fields of metallurgy, petroleum, chemical, industrial and mining enterprises and infrastructure, etc. Concept of modular system and digital technology are perfectly integrated into the MNS digital switchgear, so that the MNS® switchgear keeps up-to-date becoming an witchgear for its global and local customers.
