

Models and Specifications of Home-Use Finished Optical Cables

Overview

FTTH drop optical cable models with metal reinforcements include: GJXH, GJYXCH (self-supporting), non-metal reinforcement leather optical cable models include: GJXFH, GJYXFCH (self-supporting), indoor butterfly optical cables include 1 core, 2 core, 4 core Core and other. Optical fiber is more and more demanded thanks to the many benefits the technology provides. These benefits include high bandwidth, high transmission speed, noise immunity, enhanced data security and extended reach. Thus the cables are generally designed to provide high tensile strength, crush resistance and to withstand temperature changes between -40°C and +70°C with attenuation changes as low as possible. Standard: TS EN 60794 +20 C -20 C +70 C +20 C -Number of cycles: 2 turns -Time per each step: 12 hrs. I: Classification code and its meaning are: GY—room (field) optical cable for communication; GR—soft optical cable for communication; GJ - optical cable in communication room (office); GS - optical cable in communication equipment;. Explore our extensive portfolio of optical cable assemblies, designed to meet a variety of needs with solutions ranging from single-fiber to multi-fiber configurations.

Models and Specifications of Home-Use Finished Optical Cables

CORNING OPTICAL COMMUNICATIONS GENERIC SPECIFICATION

1.3 Finished cables shall conform to the applicable performance requirements of the Insulated Cable Engineers Association, Inc. (ICEA) Standard for Fiber Optic Premises Distribution Cable (ICEA S-83
