

# Modular Ballasted Photovoltaic Support

## Overview

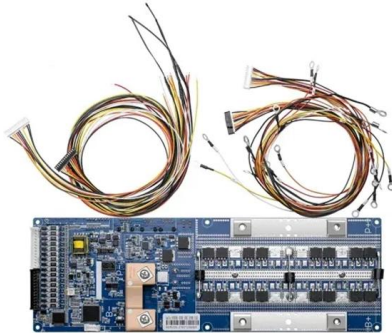

---

Support designed to be placed on the ground with a ballast capacity of 180 liters, or around 270 kg per foot with ballast made of gravel or gravel slabs. Install your photovoltaic panels on flat roofs without penetrating the roof waterproofing, thanks to ballasted mounting systems designed for fast installation, high safety, and the protection of the roof membrane. Although solar photovoltaic (PV) system costs have declined, capital cost remains a barrier to widespread adoption. Our photovoltaic ballasts have revolutionized the field of photovoltaic panel structures, and for more than a decade they have been the reference solution for all photovoltaic systems on flat roofs. Simple, fast, and versatile: the photovoltaic structures of the Single-Row System are available in a.

## Modular Ballasted Photovoltaic Support
