

# **Mozambique joins the ranks of hollow fiber optic cables 2 cores**

## Overview

---

2Africa, the largest submarine cable system in the world, which will interconnect Europe, Asia and Africa, officially reached Mozambique this week, on 15 August, in the city of Nacala-Porto. The northern Mozambican port of Nacala has been linked to the world's largest submarine fibre-optic cable system to improve digital communications, enabling the telecommunications company Vodacom to offer its customers a direct international gateway for faster and more reliable internet services. Vodacom has landed the latest section of the 2Africa submarine cable in the city of Nacala in northern Mozambique. Master Power Technologies, the project partner, inaugurated a unique data centre. A first-of-its-kind data centre was also officially opened today by project partner, Master Power Technologies.

## Mozambique joins the ranks of hollow fiber optic cables 2 cores
