

New version of distribution box

Overview

Modern distribution solutions range from weatherproof outdoor units to smart hubs that communicate with your utility company. For complex commercial wiring systems running control cables across facilities, modular distribution units prevent the "spaghetti junction" effect. Our hardware department is happy to introduce the newer and better version of the ABRITES Distribution Box. Here are six brands that are great in 2025: Schneider Electric uses smart technology for better control. Our flexible distribution boxes enable reliable, decentralized signal transmission and power transmission up to protection class IP67 - wherever passive distribution boxes are required. Master cables and M12 connectors are connected securely and conveniently by directly plugging them in.
