

No network connection after fiber optic cable is plugged in

Overview

Many fiber internet problems come from dirty connectors or loose plugs, not major faults. Power cycling or restarting your ONT (Optical Network Terminal) often resolves simple troubleshooting internet issues. Have you noticed if any cables or connectors are loose or not fully plugged in on your modem or router?

Customer: no wan connection yes did Technician's Assistant: Thanks for confirming that you've checked the cables and saw a "no WAN connection" message. Fiber optic troubleshooting is an essential skill for network administrators, technicians, and engineers responsible for maintaining and repairing fiber optic systems. These high-speed, high-capacity communication networks are increasingly replacing copper cables, offering superior performance and. You should have a Yellow/Grey Ethernet cable going from the first LAN port on your Fibre box to the blue WAN port on your Zyxel router.
