

Norway IDC Data Center Construction Plan

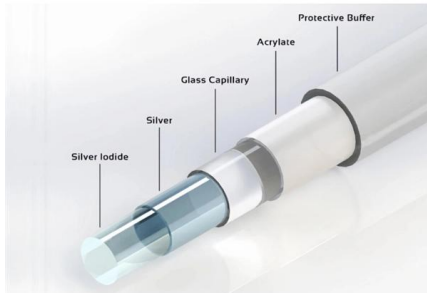

Overview

Nordic Data Center project is advancing a large-scale construction program targeting 500MW capacity across Norway and wider Nordic regions. The project aims to leverage hydropower-rich locations while accelerating hyperscale infrastructure delivery. Originally published by: Digitaliserings- og forvaltningsdepartementet Norway aims to be an attractive destination for data center establishments that contribute to overall value creation, enhanced national security, and the safeguarding of Norwegian interests.
