

Optical Communication Product Box Series

Overview

Optotec has developed different type of boxes: FOCUS NGB, LIGHT and TOP for the splicing and termination of optical fiber within network infrastructures based on GPON technology (Gigabit Passive Optical Network), Point-to-Point and Point-to-multipoint, usually employed for FTTH. Browse our broad range of connectivity products designed to help enable your communication networks. Kyocera's design technology offers outstanding high-frequency performance customized to your requirements. FlexPlane Optical Flex Circuits provide versatile, high-density routing on a flexible substrate, and Routed Ribbon Solutions offer cable management and mitigate airflow challenges for low-profile Network interface cards (NICs), switch fabric modules, complex shuffling and backplane applications. Mingqing FibrAmerica Technology, under its trade name FIBRAMÉRICA, is one of the world's leading companies dedicated to the design, development, manufacture, distribution and marketing of advanced optical connectivity solutions. Haian Guangyi Communication specializes in manufacturing a full range of ODN products, including non-jumper optical cross-connect cabinets, 24-core optical fiber distribution boxes, 16-core plastic distribution boxes, optical cable joint boxes, optical cable cross-connect cabinets, and termination.

Optical Communication Product Box Series

Cisco Optical Networking Solutions

Protect, manage and scale your networks with ease, and support the success of your business goals with Cisco Optical Networking Solutions.
