Optical Module Temperature Sensor

II-VI Semiconductor-Based Optical Temperature Sensors

This chapter presents an overview on a very important aspect of these temperature sensors, that is, optical temperature sensors. On the other hand, II-VI semiconductor materials are

Fiber Optic Temperature Sensor DTSX

Flexible and Simple Installation
High Compatibility with Production Control Systems
Excellent Environmental Resistance
Fiber optic sensors do not use electrical or electronic components in the sensor section, and therefore offer superior environmental resistance compared to other temperature sensors. They are not affected by electromagnetic noise, whether in environments where electromagnetic waves are generated, such as near power sources, or if there are lightning. See more on yokogawa COMEM
