

Optical cable specifications gjpfh

Overview

ODGJPFJH006SM = GJPFJH series indoor singlemode 9µm with 6 cores fiber optic cable. Micro fiber indoor cable use 12-fiber subunits (Ø 250 µm colored fiber, aramid yarn as strength member). The colour arrangement of fibre and tube is specified in the color identification table. Other structure and fibre count are also available according to customer requirements. At the corresponding floor, only the corresponding optical fiber is used to take out for construction. COM offers an extensive line of off the shelf bulk fiber optic cable to meet high bandwidth demand in Local Area Network (LAN) campus and building backbones as well as Data Center backbones. Optical cables for vertical wiring in buildings, which is a major component of the drop segment in FTTx networks, refer to the drop cables going from ducts in buildings into rooms.
