

Optical module CMA

Overview

The document provides technical specifications for the CMA5000a OSA optical spectrum analyzer module. It describes the module's key features such as its wide spectral range, high wavelength and power accuracy, excellent polarization dependent loss, and high optical rejection ratio. An optical module is a typically hot-pluggable optical transceiver used in high-bandwidth data communications applications. 78125Gbps, with an OM4 MMF transmission distance of up to 100 meters and a 4-channel 850nm VCSEL array Each channel has a data rate of up to 25.

Optical module CMA

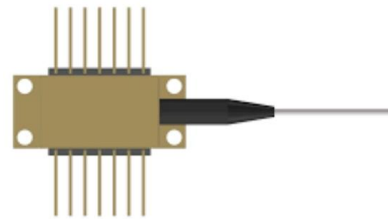

HT-CEQ2-5-CMA Liquid-cooled optical module **JOINT OPTIC**

Each channel has a data rate of up to 25.78125Gbps, with an OM4 MMF transmission distance of up to 100 meters and a 4-channel 850nm VCSEL array.
