

Optical power meter 80dB

Optical power meter 80dB

Self-Calibrated Optical Power Meter with 80dB Range

Measure optical power with a wide dynamic range of 80dB. Features self-calibration, insertion loss display, and long battery life for efficiency.

Optical power meter includes free-space detectors

The OPM-200 optical power meter provides measurements with a dynamic range of 8 to -80 dBm. An InGaAs detector enables measurements from 840 to 1700 nm,

FPM200 Series Precision Optical Power Meter

The Optical Power Meter features with good appearance, wide power measurement range, high accuracy, with user self-calibration function and reference power level

Optical power meter

An optical power meter (OPM) is a device used to measure the power in an optical signal. The term usually refers to a device used for measuring the average power in fiber optic systems.
