

Overseas warehouse optical receiver OSFP

Overview

The 1600G OSFP1600 2xDR4 Transceiver is designed to transmit and receive serial optical data links up to 212. Unlike the backward-compatible QSFP-DD, OSFP introduces a slightly larger mechanical form to. OSFP was among the first form factors to support native 800G, making it a key enabler for ultra-high-speed deployments. This whitepaper highlights the key aspects and features of each solution with the expectation that both solutions will have a place in future data center applications. Eoptolink is producing full range of OSFP (Octal Small Form Factor Pluggable) a new pluggable form factor with eight high speed electrical lanes that will initially support 400 Gbps (8x50G or 4x100G).
