All-dielectric self-supporting cable

All-dielectric self-supporting cable All-dielectric self-supporting (ADSS) cable is a type of optical fiber cable that is strong enough to support itself between structures without using conductive metal

Technical Parameters of ADSS Fiber Optic Cables

Also known as special use tension, it refers to the maximum tension of the optical cable that may exceed the design load during the effective life of the optical cable.

OPTICAL FIBER CABLE SPECIFICATION (ADSS-Span= 100m)

1. General 1.1 The specification covers the construction and properties of single mode optical fiber cable.

What is ADSS Fiber Optic Cable?

ADSS fiber cable is mainly used on power pole
frames, so it is required to have high mechanical
strength and be able to withstand the impact of
strong electric
